

Within healthcare and caregiving, physical lifting is one of the major causes of work-related injuries. Every year, thousands of cases are reported where healthcare staff suffer from serious musculoskeletal injuries leading to long-term sick leave and career changes. The Swedish Work Environment Authority previously reported that 30% of all reported work injuries in healthcare professions are related to patient handling. These injuries are not only painful and costly for the individual caregiver, but they also affect the quality of care and the well-being of patients. In traditional care settings and even at home it often requires two people to collaborate to lift a patient which is not only time-consuming but also increases the risk of injuries. Back injuries are a common problem not only among professional caregivers but also among family members who take care of their loved ones. These injuries often occur when families face the heavy burden of moving a sick family member who cannot move independently. NordMov's latest transfer chair/patient lift is designed to address these challenges by revolutionizing how patients and the elderly are handled in daily care environments. This medical device is approved according to the strict Medical Device Regulation (MDR), ensuring the highest standards of safety and quality.

## NordMov transfer chair/patient lift with electric lifting system

### Model: NordMov E

NordMov E transfer chair/patient lift, where "E" stands for electric lifting system, represents the pinnacle of innovation in mobility aids. This all-in-one solution is meticulously designed to make life easier for both users and caregivers. Serving as a patient lift, shower chair, commode chair, and walker, it meets all mobility needs and performs lifts at the push of a button. This medical device is also approved according to the MDR regulation, ensuring the highest standards of safety and quality.

### Electric Lifting System

Equipped with an advanced electric lift mechanism, this chair simplifies the process of moving patients. Caregivers can easily lift the patient and adjust the chair's height, reducing physical strain and eliminating the need for heavy lifting. The chair can also be raised and lowered with a simple remote control.

<b>WEIGHT (KG)</b> 23	<b>CHASSIS MATERIAL</b> Alu	<b>TOTAL LENGTH (CM)</b> 77	<b>OVERALL WIDTH (CM)</b> 56.5	<b>OVERALL HEIGHT (CM)</b> 88-118	<b>BATTERY</b> 24v, 4Ah	<b>CHARGING TIME (HOUR)</b> 2	<b>WATERPROOF</b> Yes
<b>ENGINE</b> Electrical	<b>USER WEIGHT (KG)</b> 150	<b>FRONT WHEEL (CM)</b> 5" Solid	<b>REAR WHEEL (CM)</b> 3" Solid	<b>SEAT WIDTH (CM)</b> 46	<b>SEAT HEIGHT (CM)</b> 46-76	<b>SEAT DEPTH (CM)</b> 40	<b>BACKREST HEIGHT (CM)</b> 37-53

## Functionality and Flexibility in Focus

The chair's versatility makes it unique; it serves not only as a transfer chair but also as a patient lift, shower chair, commode chair, and walker, meeting all mobility needs. This all-in-one system minimizes the need to move patients between different aids which is often both time-consuming and risky. With the help of an advanced electric lifting mechanism or a hydraulic system caregivers can easily adjust the height of the chair eliminating the need for physical lifts and thus reducing the risk of back injuries.

**WARRANTY**  
**10 YEARS FRAME**     **2 YEARS COMPONENT**

## Safety and stability

Both users and caregivers safety is further enhanced with features such as a 180° split seat frame that allows easy height adjustment and lockable brakes that ensure stable and safe use. These details not only facilitate transfers within various care environments but also ensure that users can feel secure during movement and rest.

## Built to last and easy to use

The chair is constructed from high-quality aluminum and equipped with solid wheels making it both durable and reliable. Comfort is enhanced with soft easy-to-maintain cushions and adjustable features that ensure the chair fits through various doorways and adjusts well at different seating surfaces. The chair is also designed to be easily foldable making it ideal for both care facilities and home use.

## A more humane and efficient care

By providing a solution that both increases safety and efficiency, NordMov's transfer chair/patient lift contributes to more humane and dignified care. It enables caregivers to provide pain-free and stress-free assistance thereby strengthening the quality and empathy in patient handling. Our transfer chair/patient lift is more than just a chair; it is a step forward in the pursuit of a more sustainable and humane healthcare sector. Our goal is to integrate technology and comfort in caregiving and offer innovation that can revolutionize the daily lives of both caregivers and patients.

## Key features

### Versatile Functionality

NordMov's transfer chair/patient lift transitions smoothly between its various functions without requiring physical lifting, making it perfect for varied daily movements and transporting patients to locations such as the shower, toilet, or other areas.

### Broad User Compatibility

Ideal for individuals who have difficulty walking or moving, such as the elderly, disabled, mentally challenged, pregnant women, those with incontinence, paralyzed, postoperative patients, and more. It caters to a wide range of needs, promotes independence, and enhances the quality of life.

### Single Caregiver Operation

Designed with caregivers in mind, our transfer chair/patient lift can be handled by just one person. This feature not only saves effort but also helps prevent back injuries often associated with manual patient handling.

### Enhanced Safety Features

Our transfer chair/patient lift comes with a 180° split seat frame that allows for easy movement of the patient. Additionally, stability is ensured with lockable brakes and dual anchors when the patient is seated on the chair, providing a safe experience during transfers.

Transfer chair/patient lift with hydraulic lifting system

### Model: NordMov H

## Superior Construction

Built with high-quality aluminum, NordMov's transfer chair/patient lift offers durability and reliability. Its puncture-proof, medically quiet wheels provide a smooth ride and support up to 150 kg.

## Comfort and Portability

The chair's adjustable features ensure it fits through doorways and aligns with various seating heights; it folds compactly for easy transport and storage. The chair has soft cushions that are easy to clean.

## Enhance Caregiving with NordMov

NordMov's transfer chair/patient lift is not just a mobility aid; it significantly enhances caregiving routines. It offers a stress-free, painless way for caregivers to assist their loved ones, reduces physical strain, and improves the quality of care.

<b>WEIGHT (KG)</b> 27	<b>CHASSIS MATERIAL</b> Alu	<b>TOTAL LENGTH (CM)</b> 78	<b>OVERALL WIDTH (CM)</b> 56	<b>OVERALL HEIGHT (CM)</b> 93-125	<b>BACKREST HEIGHT (CM)</b> 37-53	<b>WATERPROOF</b> Yes	<b>LIFT SYSTEM</b> HYDRAULIC	<b>REAR WHEEL (CM)</b> 3" Solid	<b>FRONT WHEEL (CM)</b> 5" Solid
